WORK EXPERIENCE

FULL STACK SOFTWARE ENGINEER

Jan 2024 - present

Los Andes - Enterprise Solutions | Brownsville, Texas, United States (Remote) | **WEB**

- Developed CRM systems for clients, streamlining internal processes, improving call logs, reminders, and employee records using Flask, Django, React, JavaScript, Python, Node.js, and Tailwind CSS to create a scalable architecture and enable seamless communication between services.
- Maintained and optimized web applications for customer/user management, inventory control, account administration, invoicing, and payment processing, ensuring system performance and improving collection processes to reduce revenue loss.

SYSTEMS AND DATABASE ADMINISTRATOR

Jan 2024 - present

TS Network | Brownsville, Texas, United States (Remote) | **WEB**

- Designed and managed the company's database, implementing efficient relationships between tables, ensuring data normalization, and utilizing SQL to maintain high data integrity.
- Monitored call logs and system performance, proactively identifying bottlenecks and ensuring timely updates to client, sales, and payment records, enhancing operational efficiency.

FULL STACK DEVELOPER

Jan 2022 – Jan 2024

Self-employed (Hybrid)

- Developed websites, software solutions, and cross-platform applications using Java, PHP, C++, and NoSQL, delivering high-quality, scalable results tailored to client needs. Designed and managed databases, web layouts, and user interfaces, collaborating with clients to define requirements and deliver efficient, maintainable solutions.
